

# Transition Your Pet to Landspath

Landspath is not like store-bought pet food. **It is important for your pet's health** that you follow our transition guide step-by-step to ensure success for you and your pet!

## THE FIRST STEP ON THE PATH

Continue to supplement your pet's regular food with the probiotics you received. Add one pouch per day, either all at once or split between meals, to the food you already serve your pet. After 7 days of probiotics, you're ready to move forward.

## NAVIGATING THE TRAIL

Every journey begins with a single step. Follow the order on the food cartons for your pet's custom transition plan:

### Box 1 (covers week 1)

---

For days 1-5, this box contains enough food to replace **25%** of your pet's current food with Landspath

For days 6-7, this box contains enough food to replace **50%** of your pet's current food with Landspath

### Box 2 (covers week 2)

---

For days 8-10, continue with **50%** of your pet's current food with Landspath

For days 11-14, replace **75%** of your pet's current food with Landspath

### Box 3 & 4 (covers the rest of your month's meals)

---

**Your pet should be eating only Landspath now—and loving every bite.**

Your pet's bowl may look a little less full with Landspath, because our food is nutrient dense and high in protein without fillers like in store-brand food. Rest assured they're getting exactly what they need and none of what they don't.

## TRAILBLAZING

If you have questions about Landspath (*or you're just a perfectionist like us*) you can call us at **1.800.720.5730** or email **hello@landspath.com**.

We'll be happy to chat at any point in your Landspath journey!
